A Comparative Effectiveness Study of Intravitreal Aflibercept, Bevacizumab and Ranibizumab for Diabetic Macular Edema (T)

Ocular Examination (Follow-up)

tblTOcularExamFU

PtID: tblPtRoster.PtID
Namecode:
Study Eye: tblPtRoster.StudyEye

☐ **Ocular Examination Not Done** **OcuExamNotDone**

Reason any portion of the ocular exam not done: _____

Record changes in the examination of the anterior segment (lids/conjunctiva, cornea, anterior chamber, iris), lens, and posterior segment (vitreous, retina, choroid, optic disc) meeting the definition of an adverse event or affecting visual acuity more than previously reported.

OcuExamDtDaysFromEnroll **Ocular exam date:** ___ ___ / ___ ___ ___ /___ ___ ___ ___

OCULAR EXAM – RIGHT EYE (OD)

OcularAdvEventOD

1. In the exam of the anterior segment, lens, or posterior segment of the right eye (OD), are there any new abnormalities, not previously reported, that meet the definition of an adverse event or is there worsening of an ongoing adverse event that has not been previously reported?

○ Yes ○ No ○ Cannot determine ○ Not Done

If *Yes*, complete the following:

OcularAdvEvent1OD

Change # 1

1. Affected part of eye:
Lids/conjunctiva
Cornea
Anterior chamber
Iris
Lens
Vitreous
Retina
Choroid
Optic disc

2. Describe change:

	_____
OcularAdvEvent1VAOD	**3. Estimated effect on visual acuity?** O None O 20/ 25- 20/40 O 20/50 – 20/100 O < 20/100
OcularAdvEvent2OD	**Change # 2** **1. Affected part of eye:** Lids/conjunctiva Cornea Anterior chamber Iris Lens Vitreous Retina Choroid Optic disc **2. Describe change:** _____
OcularAdvEvent2VAOD	**3. Estimated effect on visual acuity?** O None O 20/ 25- 20/40 O 20/50 – 20/100 O < 20/100
OcularAdvEvent3OD	**Change # 3** **1. Affected part of eye:** Lids/conjunctiva Cornea Anterior chamber Iris Lens Vitreous Retina Choroid Optic disc **2. Describe change:** _____
OcularAdvEvent3VAOD	**3. Estimated effect on visual acuity?** O None O 20/ 25- 20/40 O 20/50 – 20/100 O < 20/100
OcularAdvEvent4OD	**Change # 4** **1. Affected part of eye:** Lids/conjunctiva Cornea Anterior chamber Iris Lens Vitreous Retina Choroid Optic disc **2. Describe change:** _____
OcularAdvEvent4VAOD	**3. Estimated effect on visual acuity?**

	O None O 20/ 25- 20/40 O 20/50 – 20/100 O < 20/100

OCULAR EXAM – LEFT EYE (OS)	
OcularAdvEventOS	**1. In the exam of the anterior segment, lens, or posterior segment of the left eye (OS), are there any new abnormalities, not previously reported, that meet the definition of an adverse event or is there worsening of an ongoing adverse event that has not been previously reported?** O Yes O No O Cannot determine O Not Done
OcularAdvEvent1OS **OcularAdvEvent1VAOS**	**If *Yes*, complete the following:** **Change # 1** **1. Affected part of eye:** Lids/conjunctiva Cornea Anterior chamber Iris Lens Vitreous Retina Choroid Optic disc **2. Describe change:** _____ **3. Estimated effect on visual acuity?** O None O 20/ 25- 20/40 O 20/50 – 20/100 O < 20/100
OcularAdvEvent2OS **OcularAdvEvent2VAOS**	**Change # 2** **1. Affected part of eye:** Lids/conjunctiva Cornea Anterior chamber Iris Lens Vitreous Retina Choroid Optic disc **2. Describe change:** _____ **3. Estimated effect on visual acuity?** O None O20/ 25- 20/40 O 20/50 – 20/100 O < 20/100
OcularAdvEvent3OS	**Change # 3** **1. Affected part of eye:** Lids/conjunctiva

	Cornea Anterior chamber Iris Lens Vitreous Retina Choroid Optic disc **2. Describe change:** _____
OcularAdvEvent3VAOS	**3. Estimated effect on visual acuity?** ○ None ○ 20/ 25- 20/40 ○ 20/50 – 20/100 ○ < 20/100
OcularAdvEvent4OS	**Change # 4** **1. Affected part of eye:** Lids/conjunctiva Cornea Anterior chamber Iris Lens Vitreous Retina Choroid Optic disc **2. Describe change:** _____
OcularAdvEvent4VAOS	**3. Estimated effect on visual acuity?** ○ None ○ 20/ 25- 20/40 ○20/50 – 20/100 ○ < 20/100

INFLAMMATION ASSESSMENT – RIGHT EYE (OD)	
InflAssessNotDoneOD	☐ **Not Done** *If not done, give reason in Ocular Exam Not Done comments at the top of the form* *If Done, please complete the following*
AntChCellsOD	**1. Anterior chamber cells:** ○ 0 cells/hpf ○ 1-5 cells/hpf ○ 6-20 cells/hpf ○ >20 cells/hpf ○ Cannot assess (media opacity)
VitreousHazeOD	**2. Vitreous Haze** *(based on view with 20D lens and indirect ophthalmoscope unless otherwise stated)* **:**

	○ 0-Clear ○ 1-Trace haze; cells visible behind lens with slit lamp but 20D view clear (not red cells) ○ 2-Mild blur ○ 3-Vessels visible, but blurry ○ 4-No vessels visible, can see optic nerve ○ 5-Optic nerve not visible ○ 6-Cannot assess (media opacity or vitreous hemorrhage)

INFLAMMATION ASSESSMENT – LEFT EYE (OS)	
InflAssessNotDoneOS	☐ **Not Done** *If Required but not done, give reason in Ocular Exam Not Done comments at the top of the form* *If Done, please complete the following*
AntChCellsOS	**1. Anterior chamber cells:** ○ 0 cells/hpf ○ 1-5 cells/hpf ○ 6-20 cells/hpf ○ >20 cells/hpf ○ Cannot assess (media opacity)
VitreousHazeOS	**2. Vitreous Haze** *(based on view with 20D lens and indirect ophthalmoscope unless otherwise stated)***:** ○ 0-Clear ○ 1-Trace haze; cells visible behind lens with slit lamp but 20D view clear (not red cells) ○ 2-Mild blur ○ 3-Vessels visible, but blurry ○ 4-No vessels visible, can see optic nerve ○ 5-Optic nerve not visible ○ 6-Cannot assess (media opacity or vitreous hemorrhage

DIABETIC RETINOPATHY EXAM – RIGHT EYE (OD)

DMENotDoneOD

☐ **Not Done**
If Required but not done, give reason in Ocular Exam Not Done comments at the top of the form
If Done, please complete the following

DRSeverityOD

1. Diabetic Retinopathy Severity

- O 0-None
- O 1-Microaneurysms only
- O 2-Mild/moderate NPDR
- O 3-Severe NPDR (4-2-1 rule)
- O 4-PDR (NVE, NVD and/or vitreous or preretinal hemorrhage considered due to DR) and/or prior scatter
- O 5-Cannot determine

If 4 selected above, answer questions 1a and 1b:

ScarsPhotoPresOD

1a. Are scars of scatter (panretinal) photocoagulation present?

- O No
- O Questionable or partial
- O Yes (at least 3 quadrants with scars ≤ 3 scar diameters apart)
- O Cannot assess (media opacity or vitreous hemorrhage)

VesVitHemPresOD

1b. Are new vessels and/or vitreous/preretinal hemorrhage present?

- O No
- O Yes, post-PRP, not sufficient to justify additional PRP
- O Yes, post-PRP, additional PRP indicated
- O Yes, no prior PRP
- O Cannot assess (media opacity or vitreous hemorrhage)

DMEClinExamOD

2. DME on clinical exam:

- O None
- O Present, center not involved
- O Present, center involvement uncertain
- O Present, center involved
- O Cannot determine

DIABETIC RETINOPATHY EXAM – LEFT EYE (OS)

DMENotDoneOS

☐ **Not Done**
If Required but not done, give reason in Ocular Exam Not Done comments at the top of the form
If Done, please complete the following

DRSeverityOS

1. Diabetic Retinopathy Severity (OS):

- O 0-None
- O 1-Microaneurysms only
- O 2-Mild/moderate NPDR
- O 3-Severe NPDR (4-2-1 rule)
- O 4-PDR (NVE, NVD and/or vitreous or preretinal hemorrhage considered due to DR) and/or prior scatter
- O 5-Cannot determine

ScarsPhotoPresOS

If 4 selected above, answer questions 1a and 1b:

1a. Are scars of scatter (panretinal) photocoagulation present?

- O No
- O Questionable or partial
- O Yes (at least 3 quadrants with scars ≤ 3 scar diameters apart)
- O Cannot assess (media opacity or vitreous hemorrhage)

VesVitHemPresOS

1b. Are new vessels and/or vitreous/preretinal hemorrhage present?

- O No
- O Yes, post-PRP, not sufficient to justify additional PRP
- O Yes, post-PRP, additional PRP indicated
- O Yes, no prior PRP
- O Cannot assess (media opacity or vitreous hemorrhage)

DMEClinExamOS

2. DME on clinical exam:

- O None
- O Present, center not involved
- O Present, center involvement uncertain
- O Present, center involved
- O Cannot determine

Note: If non study eye is the right eye this section will be shown above left eye section (study eye)

OCULAR EXAM- NON-STUDY EYE (OD/OS)	
NSOcularAdvEvent	**1. Are there any abnormalities in the exam of the anterior segment, lens, or posterior segment of the right/left eye, not previously reported, that meet the definition of a new adverse event?** ○ Yes ○ No ○ Cannot determine ○ Not Done *(If Yes, complete a new Adverse Event Form if not already done.)*
NSWorsePrevRptAE	**2. Has there been a worsening of a previously reported adverse event based on the exam of the anterior segment, lens, or posterior segment of the right/left eye?** ○ Yes ○ No ○ Cannot determine ○ Not Done *(If Yes, update the existing Adverse Event Form if not already done.)*
