A Comparative Effectiveness Study of Intravitreal Aflibercept, Bevacizumab and Ranibizumab for Diabetic Macular Edema (T)

OCT Exam Form (Randomization)

tblTOCT

PtID: **(tblPtRoster.PtID)**

Patient Initials:
Study Eye: **(tblPtRoster.StudyEye)**

☐ **Not Done** **(OCTNotDone)**

If Required but not done, give reason in COMMENTS

Perform an OCT exam on the eye(s) being evaluated for the study. OCT exam must be done within 8 days prior to randomization.

- For eligibility central subfield thickness on OCT must be:
  - Zeiss Stratus: ≥250;
  - Zeiss Cirrus and Optovue RTVue: Men ≥305; Women ≥290;
  - Heidelberg Spectralis: Men ≥320; Women ≥305
- OCT exam must be done within 8 days of randomization.
- The investigator must verify the accuracy of the OCT scan by ensuring it is centered and of adequate quality.

GENERAL INFORMATION

1. OCT: Date Performed: ___ ___/___ ___ ___/___ ___ ___ ___ **(OCTExamDtDaysFromEnroll)**
dd/MMM/yyyy

2. OCT: Time Performed: _____ am/pm **(OCTTimeHr) (OCTTimeAMPM)**

3. OCT Technician ID: __ __ __ - __ __ __

OCT Machine

1. OCT Machine: **(OCTMachine)**

- O Zeiss Cirrus
- O Zeiss Stratus
- O Heidelberg Spectralis
- O Optovue RTVue

RIGHT EYE (OD)

Complete this section only if right eye is being evaluated for eligibility

1. Was OCT performed on the RIGHT eye? ○ **Yes** ○ **No** **(OCTPerfOD)**

If No, complete the following:

1a. Reason:_____

If Yes, complete the following:

1b. Does the OCT have artifacts, boundary line, or centration issues which may invalidate the automatic measurements (if yes, the image may be sent to the Reading Center for grading)?
○ **Yes** ○ **No** **(ArtBoundLnIssuesOD)**

If No, enter the following information from your OCT analysis printouts:

i. ☐ **The investigator has reviewed the OCT image and confirmed the OCT does not have artifacts, boundary line, or centration issues. (Note if not complete detail reason in comments).** **(OCTImgConfirmOD)**

ii. **Central Subfield Thickness:** _____ **(OCTCenterOD)**

iii. **Signal Strength** (if available from machine)**:** _____ **(SignalStrengthOD)**

iv. **Analysis Confidence Low** (if available from machine)**:** _____ **(AnalysisConfLowOD)**

v. **Macular Subfield Thickness (enter exactly as shown on the OCT grid printout):** _____ **(OCTInSuperOD)**

LEFT EYE (OS)

Complete this section only if left eye is a study eye

1. Was OCT performed on the LEFT eye? ○ **Yes** ○ **No** **(OCTPerfOS)**

***If No, complete the following*:**

1a. Reason:_____

If Yes, complete the following:

1b. Does the OCT have artifacts, boundary line, or centration issues which may invalidate the automatic measurements (if yes, the image will be sent to the Reading Center for grading)?
○ **Yes** ○ **No** **(ArtBoundLnIssuesOS)**

If No, enter the following information from your OCT analysis printouts:

i. ☐ **The investigator has reviewed the OCT image and confirmed the OCT does not have artifacts, boundary line, or centration issues. (Note if not complete detail reason in comments).** **(OCTImgConfirmOS)**

ii. Central Subfield Thickness: _____ **(OCTCenterOS)**

iii. Signal Strength (if available from machine)**:** _____ **(SignalStrengthOS)**

iv. Analysis Confidence Low (if available from machine)**:** _____ **(AnalysisConfLowOS)**

v. Macular Subfield Thickness (enter exactly as shown on the OCT grid printout): _____ **(OCTInSuperOS)**
