A Comparative Effectiveness Study of Intravitreal Aflibercept, Bevacizumab and Ranibizumab for Diabetic Macular Edema (T)

Randomization Form

tblTRandomization

PtID: **(tblPtRoster.PtID)**

Patient Initials:

Randomization

1. Name of Investigator _____

2. Site Location: _____

3. ☐ The study participant has verbally reconfirmed his/her understanding of the trial, willingness to accept the assigned treatment group, and commitment to the follow-up visits **(VerbalReconfirmStudy)**

NOTE: If both eyes are eligible, the eye that never received anti-VEGF treatment should be randomized. If both eyes have previously received anti-VEGF treatment or both eyes have never received anti-VEGF then the study eye should be selected by the investigator and the participant before randomization.

4. Please select the eligible eye to be randomized for the study: O OD O OS **(RandEye)**

The baseline injection must be given on the day of randomization. If the injection cannot be given today, then the subject should NOT be randomized.

Non-Study Eye Treatment

1. Will the non-study eye receive an injection of anti-VEGF for any indication? O Yes O No **(NSEyeAntiVEGFInj)**
(if yes, complete a non-study eye anti-VEGF injection form)

Gift Card

1. Will a gift card be provided to the participant? O Yes O No

1a. If Yes, enter the gift card number that corresponds with the gift card that will be provided:_____

1b. If No, indicate the reason a gift card will not be provided:_____
