A Comparative Effectiveness Study of Intravitreal Aflibercept, Bevacizumab and Ranibizumab for Diabetic Macular Edema (T)

Urine Sample Collection Form

Please complete the following information after a urine sample has been collected from the participant.

Upon submission of this form please complete a Urine Sample Transmittal log to ship the sample.

The urine sample should be refrigerated immediately until it can be transferred to the transport vial. If the sample will not be shipped within 24 hours the sample should be frozen at -20ºC. Urine samples should remain frozen until they can be shipped. Urine samples are required to be shipped within 7 days of collection. Please see study Procedures Manual for more information on the sample draw and shipment procedures.
